

# HPE Hiring experience

HPE Hiring process consists of 4 rounds:

- 1) Written test
- 2) Technical interview
- 3) HR round
- 4) MR round

## 1) Written test

The test consist of 50 questions which was divided into 3 sub sections:

- a. 20 Questions -> Aptitude and Reasoning
- b. 22 Questions -> Core Subjects
- c. 8 Questions -> OOPS (C++/JAVA )- No python

Cut off was around 80% and 50 students were selected for the next round

## 2) Technical round

Went for around 1 hour

5 mins – Introduction

10 mins Brief discussion about templates in C++ and LinkedList

15 mins Discussion on OS basic concepts and real world applications

15 mins CN discussion simple routing questions and 3 way handshaking etc

15 mins DSA online coding ,2 question medium and easy level

Last 10 mins Low level Design question Development of a Game Tic Tac Toe using Class and objects

## 3) Managerial Round

Now once you have clear technical round then the journey is much easier.

Most of the question in managerial round revolve around normal things like plan for higher studies, your comfort with in relocating and few more things to know your mindset basically.

**(Major points to remember they ask about higher studies and current offers be very smart while answering these questions)**

It lasts hardly for 15 min.

## 4) HR round

This was also simple round and normal discussion about yourself, hobbies and few more normal questions.

But they asked few questions like CEO of HPE and few other companies.

This also last for around 10 min.
